

## **MESSAGE FROM AIR LIQUIDE SINGAPORE**

Congratulations to all the recipients of the Singapore Chemical Industry Council (SCIC) Responsible Care Awards 2021!

The past two years have been a challenging period for many of us. However, despite the challenges faced, each and every one of us here are committed to practise and implement the Responsible Care Codes of Practices. This is evident through the SCIC Responsible Care Awards where many were recognized for their outstanding management practices in the area of responsible care, and demonstrated performance in Health, Safety and Environment performance.

Responsible Care is the global chemical industry's initiative to drive continuous improvement in health, safety and environmental (HSE) performance while engaging its respective stakeholders in open and transparent communication. As a world leader in the gases, technologies and services for Industry and Health, Air Liquide is committed to placing HSE as an integral part of its operational excellence and culture.

Being Responsible Care companies, let us continue to support SCIC in driving the chemical industries towards a responsible and sustainable chemical industry in Singapore.

## RC Award Sponsor MD message

The Mitsui Chemicals Group's Corporate Mission and Action Guidelines acknowledges that its business challenge is not only to comply with laws and regulations of the countries in which it does business, but also to continuously contribute to the improvement of safety, health, the environment, and quality, for the sustainable development of society. Therefore, it is a pleasure and honour for Mitsui Phenols Singapore to sponsor the SCIC Annual Lunch and Responsible Care Award, which recognizes the various industry stakeholders that demonstrated outstanding management practices in areas of responsible care. This shows our support for the SCIC Responsible Care Initiative, which is all the more critical in the current tough environment of achieving sustainability in our industry.

Congratulations to all the recipients of the Singapore Chemical Industry Council (SCIC) Responsible Care Awards 2021!

**Masayoshi Kuwajima**  
Managing Director  
Mitsui Phenols Singapore Pte Ltd

Congratulations to all recipients of the Singapore Chemical Industry Council (SCIC) Responsible Care Awards 2021.

The SCIC Responsible Care Awards, established in 2001, recognises companies committed to practising and implementing the Responsible Care Codes of Management Practices to maintain high health, safety and environmental (HSE) standards.

Infineum supports Responsible Care, an initiative by the global chemical industry to drive continuous improvement in HSSE performance. It is also aligned with Infineum's 2025 Corporate Sustainability Goals that deliver our commitment in reducing our environmental impact across our operations and engaging our people and community.

## **Congratulatory message for SCIC Responsible Care Awards 2021**

Petrochemical Corporation of Singapore (Private) Limited (PCS) is honoured to be conferred the SCIC Leadership Award 2021.

The Award is a due recognition that PCS has been doing on the right track as a leader, aligning our programmes through management practices in Responsible Care®. We have been securing the health and safety of our workforce, their mental well-being with security, environmental and sustainability practices.

As a Responsible Care® signatory company, we are committed to support SCIC in its programmes and sharing our experiences and practices for the betterment of the chemical industry.

Hisashi Shibayama  
Managing Director

Neste on RC Awards:

The SCIC Responsible Care Awards is a recognition of companies' demonstrated commitment and excellent performances in the 7 codes of responsible management practices. This is an honourable award and on behalf of Neste, I like to offer my sincere congratulations to the winners and applaud them for their firm commitment, hard work and outstanding achievements.

The sudden outbreak of the pandemic and increasingly visible and impactful consequences of climate change have brought to the fore the importance and relevance of Responsible Care Principles in health care crisis management and efforts to accelerate climate neutrality initiatives, circular economy and resource efficiency. Care for the mental well being of our employees and the community has also taken on a new meaning in the Responsible Care codes of practice as we move forward to the New Normal.

Neste's relatively short presence and low profile in Singapore belies its contributions and ambitions in our collective global fight against climate change. With the purpose to create a healthier planet for our children and the vision to lead the way towards a sustainable future together, Neste has been pushing forward to search for new and innovative ways to remove carbon from the atmosphere and expand our businesses and production capacities to help companies make their businesses more sustainable. The expansion of the Singapore Renewable Diesel Refinery is currently progressing well and when completed in the 1st quarter of next year, will become the largest renewable diesel and sustainable aviation fuel refinery in the world. We look forward to contributing towards Singapore's 2030 Green Plan and invite all like minded Responsible Care signatories and industry players to collaborate and create a sustainable future for future generations.

Once again, my warmest congratulations to the award winners.

Kenneth Lim,  
Site Director,  
Neste Singapore
