

SINGAPORE CHEMICAL INDUSTRY COUNCIL

CLEAR SHORES, CLEAN WATERS

Revitalising our Connections

'Building synergies through common action'

15 May 2020, 8am to 11am

East Coast Park

Building on the strong support received in 2019, this year's edition of the "Clear Shores, Clean Waters" Campaign will be organised in conjunction with the 'Keep Clean Singapore' 2020 campaign by the Public Hygiene Council.

As the main programme highlight, the **Revitalising our Connections** beach clean-up event will feature a **booth set-up at the marquee area for industry and NGOs** to foster cross-industry engagement on plastic-related issues.

What's Next

Note: SCIC reserves the right to amend the above activity

Support the "Clear Shores, Clean Waters" Campaign

To drive the campaign in 2020, SCIC would like to solicit members' support through a sponsorship amount of \$5,000 (before GST).

Supporters will receive exposure in the form of logo placement on the event backdrop at the **Revitalising our Connections** beach clean-up event on 15 May 2020.

CLEAR SHORES, CLEAN WATERS

"To be fronted by the Chemical Industry through SCIC, this is an industry co-ordinated effort in enhancing greater awareness with all stakeholders on the responsible use of plastics and the proper management of plastic waste"

What is it about

What We Know

“Polymers are very versatile materials that have become indispensable in supporting modern day food, water and energy security. Our industry is working hard to enable more effective plastics after-use collection and recycling processes, enabling a zero waste circular economy. As individuals and as a community, it is our joint responsibility to practice responsible use of plastics, as well as to recycle our plastic waste.”

Terence Koh,
Executive Director of SCIC

Overview

An upsurge in the visibility of worldwide concerns on plastic waste and marine litter drive the chemical industry to seek an equilibrium in public's perception of plastic waste management

As the provider of the building blocks that support the production of end consumer products , the Chemical Industry takes on a pro-active approach in demonstrating our commitment towards environmental protection
