

Plastics: Driving Sustainable Prosperity for the World's Future

PLASTIC IS ALL AROUND US

Driving Sustainability: Enabling a Low Carbon World

Most plastics are recyclable and offer a lower life cycle carbon footprint than alternative materials.

Life Cycle Carbon Footprint by Packaging Material

... Plastic property improvements reduce resource use and extend product lifespan

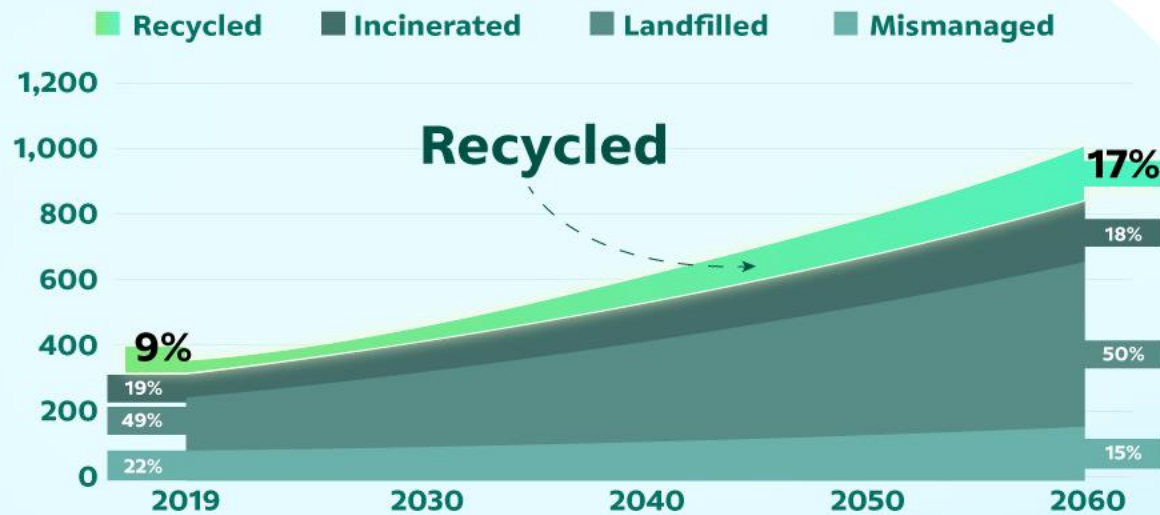

Towards a Circular Economy: Enabling the Low-Waste World

... Collaborations for plastic waste management across value chain are vital

Global Plastic Waste

Unit : Million Tonnes
